## Education

---

### University College London (UCL)

Bachelor of Science in Computer Science

Sept 2021 – June 2024  
London, United Kingdom

- Graduated with First-Class Honours
- Relevant Modules: Systems Engineering, Algorithms, Object-Oriented Programming, Security, Financial Management
- Dissertation: *"Generating novel motions from a single example using Denoising Diffusion Probabilistic Models"*

## Experience

---

### Systems Developer Analyst

Rokos Capital Management

Sept 2024 – Present  
London, United Kingdom

- Developed a ASP.NET Web API to automate updates to security and distribution groups, on-call engineer sync with Opsgenie schedules and enabling better integration with SaaS apps
- Streamlined organizational workflows by dynamically adjusting Active Directory group structures and maintaining real-time updates as employees or departments are modified
- Created a WPF application to automate workstation provisioning, including drive permissions, window placements, and connected device configurations

### Software Engineer Intern

Expedia Group

June 2023 – Sept 2023  
London, United Kingdom

- Engineered a performance analytics tool for web applications in Node.js, enabling measurement of core web vitals and automating the blocking of GitHub pull requests upon degradation detection
- Enhanced logs by providing performance improvement suggestions based on specific degradation causes
- Designed a front-end prototype in Figma to visualize performance history over time and led cross-departmental demos to assess suitability and gather feedback
- Developed a front-end using native web components with Google Lit and deployed it for internal company use

## Projects

---

### WebGL 3D Shader [↗](#)

- Developed a 3D shader from scratch in GLSL, implementing ray-tracing, rasterization, and path-tracing techniques
- Enabled real-time visualization of advanced rendering methods directly in the browser
- Incorporated real-time animation to demonstrate path-tracing progress and animated ray-traced objects

### Touchless Kiosks [↗](#)

- Designed and developed a touchless hospital kiosk interface using MediaPipe and React, enabling hand gesture input for webpage navigation
- Implemented touchless navigation and live gesture previews, with a WebExtension frontend for seamless integration
- Demonstrated the system at Great Ormond Street Hospital and incorporated feedback to enhance accessibility features
- Enabled installation as a browser sidebar extension, showcasing live previews of user gestures and interactions

### Jellyfin Plugin

- Developed an artwork and metadata scraping plugin in C# and JavaScript for the open-source media library manager Jellyfin
- Collaborated with open-source contributors on GitHub, discussing feature requests, implementations, and managing pull requests

### Set Permutation Generator [↗](#)

- Built a Django-based revision tool for discrete math students to generate and analyze set permutations in Cauchy's two-line notation
- Enabled functionality to compute the order, sign, and cyclic form of permutations, providing detailed problem-solving capabilities

## Skills

---

**Programming Languages:** C#, JavaScript, TypeScript, Python, Java, C

**Other Technologies:** Active Directory, React, Node.js, HTML, CSS, Lit, Django

**Development:** Git, SQL, Docker, Figma, Linux
